

Hello,

Thank you for your interest in participating in our study. We're looking for participants ages 18-65 (with normal hearing and no history of neurological disorders) for an auditory perception experiment in the Silver Lab.

To be eligible to participate, you must be pursuing or have completed formal training in either classical or jazz music performance at a bachelor's level (or equivalent), specializing in piano, violin, voice, or clarinet. In addition, you must practice or perform on your primary instrument for at least 5 hours per week, and have started practice on your performance instrument before age 10.

If you are a vocalist, you must be able to sing comfortably in the range B3-B5 (illustrated below or in the attachment).

The experiment will take approximately 1-3 hours, and will be completed in one session. It involves listening to different sounds and making judgments about them, as well as reproducing them on your instrument and with your voice. It will take place in 582 Minor Hall and you will be paid \$12/hour. Please contact [jsheynin@berkeley.edu](mailto:jsheynin@berkeley.edu) to set up a time.
